A trust instrument provides for payment of the income to the grantor's two adult sons in equal shares for 10 years, after which the corpus is to be distributed to his grandchildren in equal shares. The grantor reserves the power to pay over to each son up to one-half of the corpus during the 10-year period, but any such payment shall proportionately reduce subsequent income and corpus payments made to the son receiving the corpus. Thus, if one-half of the corpus is paid to one son, all the income from the remaining half is thereafter payable to the other son. The grantor is not treated as an owner under section 674(a) by reason of this power because it qualifies under the exception of section 674(b)(5)(B).
